

## See Saw @ Home – Create Line

An activity to do together with a grown up.

You will need:

- Scissors
  - Pens
  - Tape or glue
  - Ruler
  - Pencil
  - Paper
1. Use your ruler to draw lines and cut some long strips with your scissors. They should be about 3cm wide, but anything will be fine.

2. Decorate the strips with wiggly lines and patterns. We were inspired by worms.

3. Stick the two pieces of paper together at the end, so that the strips are at a right angle to each other (like the corner of a square).

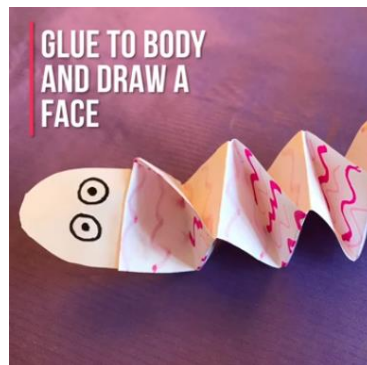

- Fold the strips over each other: If the horizontal strip is strip A and the vertical one is strip B, then fold B upwards over A and folding at the join. Then fold A over B, doing the same. Keep going, folding B and then A over the top until you run out of paper.

- Glue the last bits of each strip together at the end. This is your worm or snake body.
- Draw a worm or snake head and cut it out.

- Draw on a face and stick it to the end of your body. You can even add a tongue.

- Make another.
