

Play with objects: create some cool shapes!

In 2020 Orleans House Gallery celebrated the 300th anniversary of the Octagon Room by commissioning two site specific installations to artist group Alice in Hackneyland. *The Fluorescent Banquet* (below) was created from a collection of found and up cycled objects. For this family activity we encourage you to engage with your household objects and create your own fun shape installations.

What you will need: any colourful toys and objects from around your home. Place them on the floor to make a circle, heart, triangle and square.
